

Array of Objects 1_1

Make a class named movies which has the properties as are given below

Sample object batman1 of the class movies has the properties as listed below

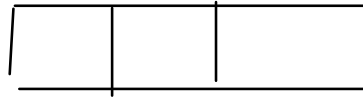

batman1
Name:Batman 1 (String data type)
Rating: 8 (int data-type)
Money Collection: 200,000 (int data-type)
Profit: 5000 (int data-type)
Lead Actor: John (String data-type)
Lead Actress: Disha (String data-type)

Sample i/p.

n=3

obj1	Batman 1
	8
	200000
	5000
	Rachel Gupta
obj2	Disha
	Batman 2
	9
	500000
	8000
obj3	Rannvijay
	Anushka
	Batman 3
	10
	700000
	6000
	Prince Narula
	Deepika

int [] arr = new int[size];

Movies [] arr = new Movies[size];
Integer [] arr = new Integer[size];
Class → user defined data type.

int
{
}

fun()

int
String
}
